## SEO

If your website isn't on the front pages of Google, does it even exist? Our SEO experts know how to whip your site into shape by adding strategic keywords, and analyzing your current content to get your website on the front pages of Google and other search engines.

Try searching for "cryptocurrency creation service" or "chatbot solutions." Not only do users looking for cryptocurrency or chatbot development see our name within a split second of searching – they also see that we are the most credible, organic option available for these services, and Google can certainly vouch for that!

With a winning SEO strategy, your chances of crawling up to the top of the ranks becomes much easier. The better your SEO, the more visible your site is, and more visibility means more customers, more profit. See how it works in our SEO guide.

Within two months of creation, the page climbed to the second position on page 2 of Google search results for its focus keywords.

At four months, the page stabilized in the second position on page 1.

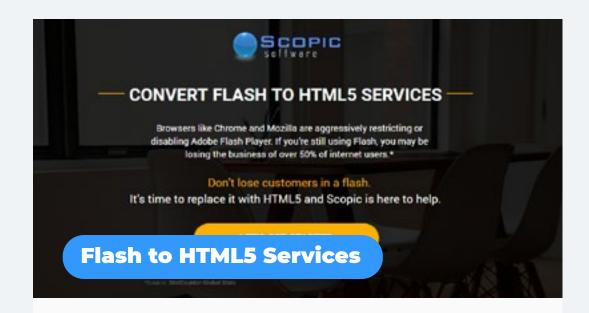

This client website ranks on the first page of search results for its main keyword and on the second page for its related keywords.

Though the website suffered a penalty, we recovered it and increased its traffic.

Currently in the fourth position on page 1 of Google's search results, this page gathers traffic for a variety of focus keywords relating to Flash to HTML5 conversion.

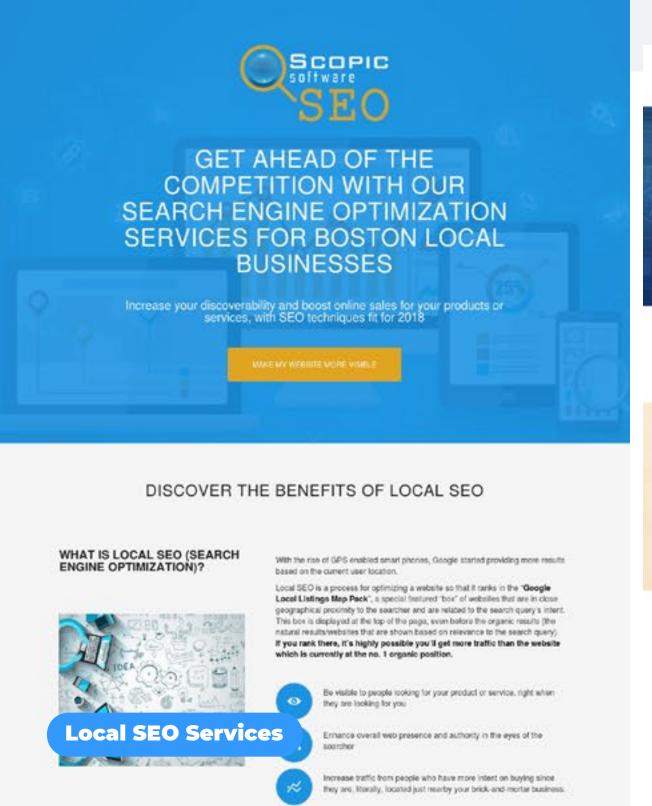

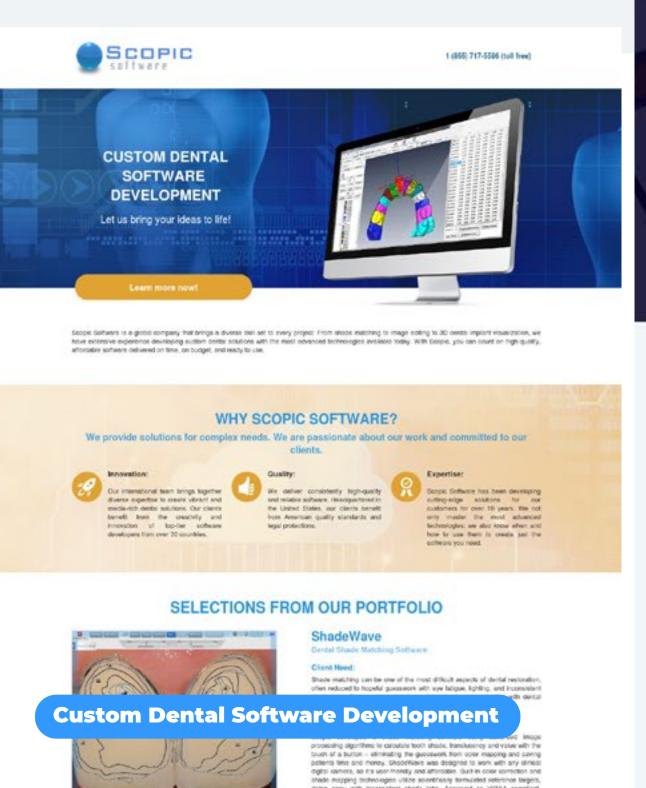

## LANDING PAGES

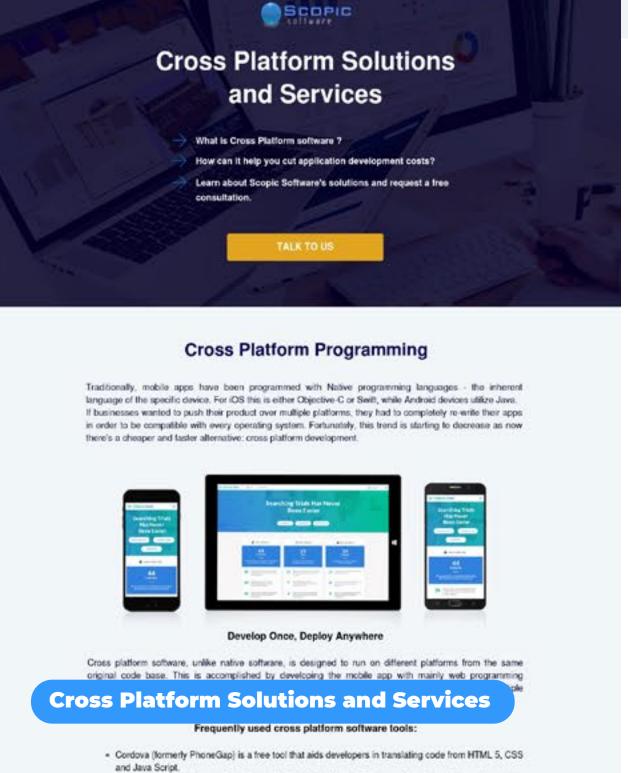

1 2

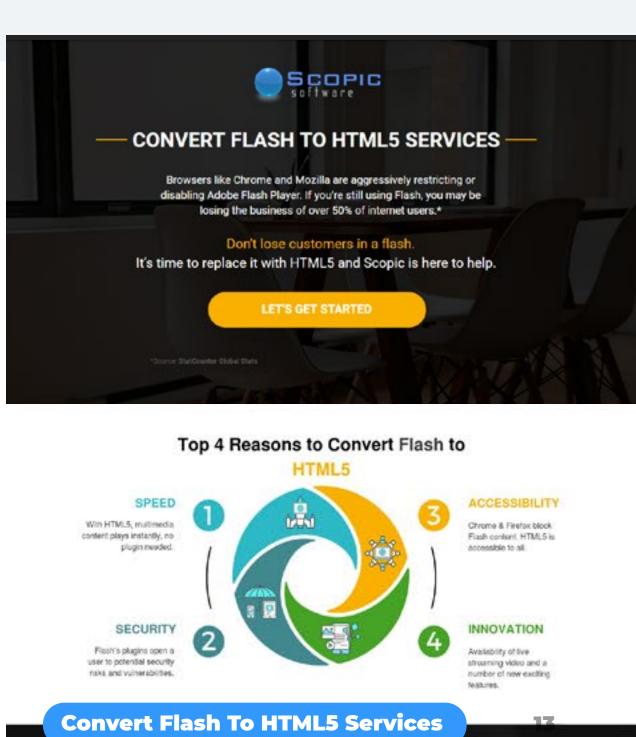

A landing page is often seen as a standalone web page designed for a single focused objective, such as improving the performance of ads or adding more focus on a certain product or service.

Our team of designers, copywriters and SEO specialists work together to optimize landing pages with the best keywords and top usability.
